

1. Title of the special session

Smart Sustainable Cities and Communities

2. Objective of the special session

Sustainable cities and communities are a need of the hour as outlined by SDG 11 too. This section will especially pertain to papers from researchers in the discipline of architecture and allied spheres who happen to be major shareholders in the creation of a sustainable built environment. It is essential to support upcoming themes and research in this realm as building construction happens to be one of the major contributors to the total global energy-related CO₂ emissions. This domain of researchers needs to be apprised of smart technology and sustainable solutions paving the way for sustainable development globally.

3. Topics of the special session

- Sustainable Inclusive Neighbourhoods
- Smart Infrastructure
- Smart Cities
- Smart Technology for Teaching learning
- Smart Heritage Development

4. Proposer's full name and affiliation (Chair of the special)

Dr. Harveen Bhandari, Dean-Research & Scholastic Development
Chitkara School of Planning and Architecture, Chitkara University,
Punjab, India

Dr. Amit Mittal, Pro-VC Research Programs, Chitkara University,
Punjab, India

Dr. Wasim Ahmed , Senior Lecturer in Digital Business
Stirling University Management School, University of Stirling, Scotland
