

Special Session Proposal

Title: Human Computer Interface (HCI) / Human Computer Interface Systems

Objectives:

To encouraging the use of human science expertise and techniques in both the creation and evaluation of computing devices;

To facilitate a deeper understanding of the relationship between formal methods of design and the accessibility and acceptability of the system;

To encouraging scientific analysis using valid and effective approaches and, where possible, researching the methods themselves.

Topics

- Human Computer Interaction for Disability
- Human Error, Resilience, Reliability, Safety and System Development
- Human -Work Interaction Design
- Human - Computer Interaction & Visualization (HCIV)
- Human-Centered Technology for Sustainability

Chair of the Special Session

Prof. R. Rajkumar

Assistant Professor

School of Computing,

SRM Institute of Science and

Technology, Kattankulathur, Chennai,

India.
